

SOCIAL MEDIA SNAPSHOT

FACEBOOK PRIVACY SETTINGS

JUNE 2010

Social networking will always be a tradeoff between safeguarding your privacy and enjoying the benefits of socializing online

<http://socialmedia.defense.gov/index.php/2009/11/02/is-your-social-media-site-protected/>

Most information used by social networking providers & advertisers is intended to provide you value

I post an update to Facebook mentioning “teachers”

This information is filtered by the social networking provider and marketed to advertisers to provide offers or services that you may like

RESULT: University of Southern California advertisement appears on my page recommending a master’s degree program to become a teacher

Become a teacher ✕

Get a Master's and teaching credential from the University of Southern California's Master of Arts in Teaching program delivered online

 Like

But when information about us or associated with us is shared publically, it can foster spam or even malicious behavior

Risks Associated with Sharing Too Much Information

- Operations security violation
- Identify theft
- Home break-ins/theft
- E-mail viruses
- Solicitors / spam

Facebook is all about sharing—with our friends, family members, shipmates and the general public

1. Some information we want to spread as far and wide as possible (e.g. public affairs messaging & crisis communications)
2. Some information we only want to share with our friends & family
3. And some information we don't want to share with anyone (in particular, information that could compromise OPSEC)!*

*Information that could compromise OPSEC should not be shared anywhere on an unsecured social networking site, regardless of your privacy settings

Even though you should assume that all information you share on Facebook could be made public, there are some precautions you can take to keep the information you want to stay just between friends from being shared publically.

We encourage Sailors, Navy personnel and their family members to use the following minimum recommended privacy settings on Facebook. It is your decision to share more or less information, just make it an informed decision!

A STEP-BY-STEP GUIDE TO YOUR PRIVACY SETTINGS

What your privacy dashboard should look like when you are finished customizing your settings

 Sharing on Facebook

Just because the "other" category is selected does not mean the specific recommended settings are in place, so be sure to go through guide.

	Everyone	Friends of Friends	Friends Only	Other
My status, photos, and posts			■

Preview My Profile

Your name, profile picture, gender and networks are always open to everyone ([learn why](#)). We suggest leaving the other basic settings below open to everyone to make it easier for real world friends to find and connect with you.

 Search for me on Facebook	This lets friends find you on Facebook. If you're visible to fewer people, it may prevent you from connecting with your real world friends.	 Friends of Friends ▼
 Send me friend requests	This lets real world friends send you friend requests. If not set to everyone, it could prevent you from connecting with your friends.	 Everyone ▼
 Send me messages	This lets friends you haven't connected with yet send you a message before adding you as a friend.	 Everyone ▼
 See my friend list	This helps real world friends identify you by friends you have in common. Your friend list is always available to applications and your connections to friends may be visible elsewhere.	 Friends Only ▼
 See my education and work	This helps classmates and coworkers find you.	 Friends Only ▼
 See my current city and hometown	This helps friends you grew up with and friends near you confirm it's really you.	 Friends Only ▼
 See my interests and other Pages	This lets you connect with people with common interests based on things you like on and off Facebook.	 Friends Only ▼

Then change settings to match what's shown at left

[Edit Settings](#)

◀ Back to Applications

Instant Personalization

Our goal is to give you a great social and personalized experience with every application and website you use. We've worked with a select set of partners to personalize your experience as soon as you arrive on their sites.

These partner sites (currently limited to [Docs](#), [Pandora](#), and [Yelp](#)) can only access the information and content you've already made available to everyone. All our partners are required to respect your information and we've worked closely with them to make sure they do.

When you arrive at one of these sites, a blue notification bar will appear at the top of the page. Click "No Thanks" if you don't want to have a personalized experience on that site.

Instant personalization is different from [social plugins](#). Social plugin content comes directly from Facebook and no information is shared with the websites themselves.

To turn off instant personalization on all partner sites, uncheck the box below. This will prevent these partners from receiving any of your information through instant personalization, even content you have made available to everyone.

Enable instant personalization on partner websites.

**Then
unselect
this box**

[◀ Back to Privacy](#)

[Edit Settings](#)

Click here

Choose Your Privacy Settings ▶ Public Search

◀ Back to Applications

Public search

Public search controls whether things you've specifically chosen to share with everyone show up in searches on and off Facebook. It also controls whether people who enter your name in a search engine will see a preview of your Facebook profile. [See preview](#)

To use this feature, first go to [Basic Directory Information](#) and set "Search for me on Facebook" to "Everyone."

Enable public search

Then unselect this box

This feature allows the information you selected to be shared with "Everyone" to be found via Google and other search engines. If you leave public search enabled, content you share with "Everyone" is open to anyone on the web, not just Facebook!

Check your chart

 Sharing on Facebook

	Everyone	Friends of Friends	Friends Only	Other

Birthday			<input checked="" type="checkbox"/>	
Can comment on posts			<input checked="" type="checkbox"/>	
Email addresses and IM				<input type="checkbox"/>
Phone numbers and address				<input type="checkbox"/>

[Customize settings](#)  This is your current setting.

**Now
you're
done!**

Networks are a great way to find and connect with people from your organization or school;

HOWEVER, networks can include anyone who has associated themselves with that group/organization, so **by opening your information up to a network, you may share information with people you do not know.**

My Account

To join or leave a network, go to “Account Settings” then select the “Networks” tab. Select “Leave Network” to remove that network, or type in your workplace or school to search for networks to join.
